## Seed Talk

## Sign Me Up!

Thank you to Jake, Chayten, Gabe, & Tristin

Your Pond Seed Company/AgriGold Team put up over 1000 signs in our community. As in the past we will be donating \$1.00 for each sign showcasing your farm. Supporting our community is what we do. **Thank you for supporting us!**

Ohio Wheat  
Performance Trials  
We did it again!  
Both our AGI 217-B  
& AGI 114 had  
excellent yields  
this year

Take a Tour  
Now is a great time to look at all of our Corn and Soybean Varieties. Let's take a tour together. We have several new Enlist and Xtend Soybeans varieties for your review. Nick, Tristin, and myself look forward to showcasing these lines chosen for our soils and disease pressure.

Most importantly during this unprecedented time we are deeply grateful for our community and each other. With everything happening in the world we have a heightened sense of appreciation for our neighbors and community. Being a local business has never been better or safer to work with. We look forward to providing you with the very best in seed and service, it's what neighbors do! ***Your Pond Seed Company Team***

### **Seed Wheat**

Our AGI 217-B finished at the top of the Ohio State Performance Trials again. Certainly it has become one of the best performing varieties in Ohio. The multi-year average is spectacular on this line. Our AGI 114 also finished strong and locally many growers reported it right

**Your Seed** should be of excellent quality this year. Please call the office and get on our cleaning schedule. Our Swamp Master Seed Treatment for wheat **will include Germate Plus**. It has shown a steady 3-5 bushel yield increase and is a Plant Growth Regulator. Germate Plus increases root development and suppresses disease and other pathogens. Scott Equity has agreed to purchase your wheat tailings this year due to the high quality. Seed Size is very small this year, so 120#/acre may be all you need. Samples can be sent in now for germination and seed size if interested. As always we cannot clean patented wheat from Becks or Pioneer.

### **Cover crops**

We have a wide selection of cover crops for fall planting. From radishes to peas, cereal rye to oats, plus **something new this year**. Many of you have asked about using barley. We have a nice supply of 84% barley, 15% VNS wheat, 1% annual rye grass for just \$13.00 per 50#. This mixture complies with all government programs and doesn't have the tremendous height of cereal rye. In the event of a wet spring in 2021 it will be 16"-24" shorter in overall height and less material to manage. Please give us a call soon if this mixture sounds right for your farm.
